

Group Focalization

the science of mobilizing the spiritual resources of groups

This workshop provides the underlying principles and essential practices for becoming an effective Group Focalizer.

We will examine groups as Bio-Psychic-Spiritual entities and explore how to work with the many psychological patterns and levels of energy that comprise the full spectrum of group life. Special emphasis will be given to the "spiritual stance of the focalizer" so that a greater capacity to magnetically shape and hold a supportive group field and to silently inspire can be experienced and learned.

The theoretical basis of the course is drawn from the precepts of Psychosynthesis and Psycho-energetics, wisdom harvested over a 30-year period of intense group endeavor in the Community of Living Ethics plus the principles and rules of group living taken from the Ageless Wisdom teachings.

Summer Course (one week seminar)

July Sunday 8 – Saturday 14

Access degree: open all

Trainers: Marina Bernardi e Michael Lindfield

Where: Aula della Cultura

Language: English
