

### **Messengers of the Solar System**

*Understanding and using the Signs of the Heavens in service of Humanity and the Planet*

The Solar System is continuously evolving according to a specific rhythm and providing, to all its parts, the energies to fulfil the divine Plan. Understanding the signs of the planetary movements and using them actively for the evolution of the individual, groups and humanity means becoming servers of the Solar System.

We will explore the planetary situation of the Year 2018-2019 as a process of preparing for 2025 and to create new thought-forms. We will use a group process, collaborating in the building of a New Civilisation.

Meditation, ritual and music will be part of the experience.
