Do join us for a day of experiential exploration of the *art of cultivating an esoteric sense*. Esoteric knowledge is not meant to drive one's spiritual life towards greater and increasing subjectivity, and introspection. Exactly the reverse is intended; all that the disciple *is* as a *builder of tomorrow's world* has to become objective. In this way their *spiritual livingness becomes an everyday affair*. It is the Soul that essentially serves as *a quality* which manifests itself as a specific vibration, and not as a particular task.

***All are welcome.***
