## Realising the full potential and contribution of groups and teams

exploring group life from an outer horizontal and inner vertical perspective. We wish to offer space for exploration and research on Group Work and Group Consciousness in the world.

### *The power of Groups*

Any project, goal or objective seems more attainable if a group of people, seeing themselves existing within a larger interdependent system, wholeheartedly commit themselves to accomplish it. Teams and groups committed to the common good are increasingly becoming an essential dimension of human expression and impact, whether in organisations, communities, nations or other groupings. We live in a challenging, uncertain, volatile yet powerful world, where individual skills and know-how are no longer sufficient to navigate toward solutions and access inherent possibilities. A world where the challenges of today can only be faced through groups using applied group wisdom and committed to the greater good.

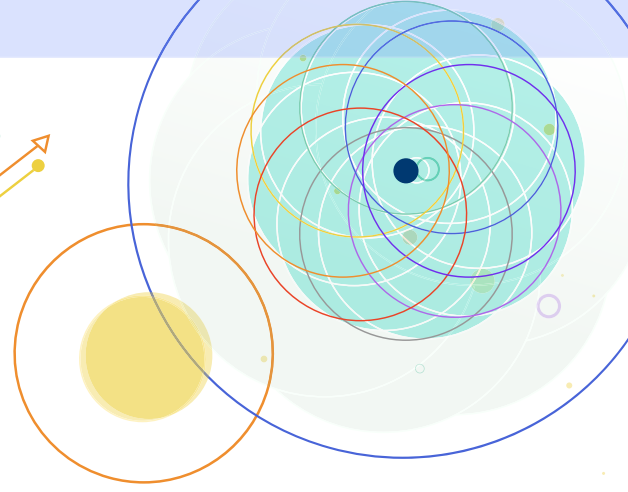

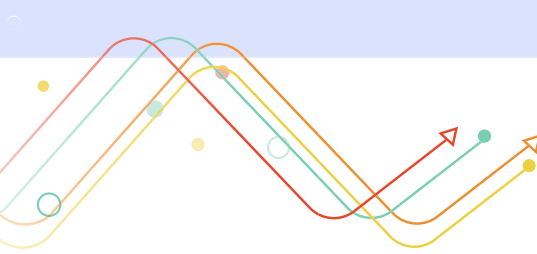

### *Who are you*

You feel there is more power and energy to be accessed and utilised for the greater good in Group work. You will be looking for a deeper understanding of the potential of groups and how to access that potential. You may be a member of a business, not for profit, NGO, a spiritual community or any other group.

### *Who we are*

We are a group of researchers and practitioners, based in the Community of Living Ethics, Umbria, Italy, experiencing and living Group Work and Group Consciousness in our work, service and lives. We are inspired to raise awareness about the Science of Group Work and Group Consciousness in all fields of human life. Our intention is to serve many groups.
